- 1. Machine features
- 2. Optomechanics features
- 3. Technical parameters
- 4. List of main accessories
- 5. Machine tool precision

#### 1. Machine features

#### Machine features:

- 1. The X/Z axis adopts high-strength and high-speed linear roller guide rails, and the rapid feed can reach 10/10 (m/min); the guide rails of each axis adopt imported heavy-duty roller linear guide rails, and the preload is V3 level, with high load capacity. , stable precision; the Y-axis slideway adopts heavy-duty rigid roller guideway, with a rapid feed rate of 10 (m/min), high precision, and strong rigidity;
- 2. Equipped with a rigid central water outlet spindle, the nose of the spindle has a unique labyrinth device and a labyrinth blowing device to effectively protect the spindle. The maximum speed of the spindle can reach 3000rpm, which has the characteristics of high rigidity and high precision;
- 3. The machine tool parts belong to a famous brand of a famous factory and are the top configuration in the industry.

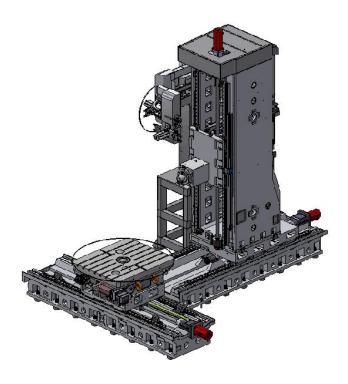

Components

# Xiamen Yangsen NC Equipment Co., Ltd.

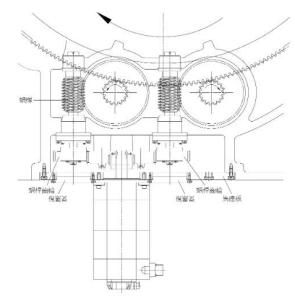

#### 2. Optomechanics features

1. 4×90° taper pin positioning, automatic hydraulic locking, digital control AC servo motor, and worm gear system to achieve good backlash compensation, B-direction worktable adopts imported hydraulic cylinder disc locking, a strong clamping mechanism that can Satisfy strong cutting conditions.

#### 轉台傳動結構:

- ▼工作臺採用超大型研磨齒輪 ,配合雙窩桿、渦輪消隙結 構確保精度
- 工作臺結合取消耐磨片,採 靜壓技術,確保工作臺精度 的穩定性及使用壽命

- 2. The spiral chip conveyor interface is reserved in the machine, and the cutting flushing device is equipped to automatically discharge the chips in time, avoiding the thermal influence of the chips on the machine tool, and ensuring the high precision of the machine tool;
  - 3. The wood mold of the casting is made of aluminum-wood combination, resin sand casting, high

No.: YSBD-130/15T

strength, and the brand is HT300 densely baked cast iron as the material mold.

#### 4. Turntable parameter

Specification		Unit	HP1820
Worktable Size		mm	1800*2000
T-Slot Size		mm	8*24-200
Servo Motor		FANUC	AIF40/3000
Minimum division unit		Deg.	0.001°
Segmentation Accuracy		Sec.	10"
Repeatability		Sec.	±4"
Total reduction ratio			1:720
Applicable environment temperature		°c	18°-40°
Oil pressure source pressure		kg/cm <sup>2</sup>	35
Table Maximum Rotations Speed		RPM	2.78
Workpiece Load	Horizontal	kg	15000
Turntable Weight		kg	6750

Xiamen Yangsen NC Equipment Co., Ltd.

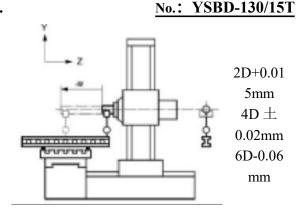

1. Move the worktable to the center of the X-axis travel

2. Put the square ruler on the workbench parallel to the Z-axis.

3. Reset the gauge to zero.

4. Move the main shaft along the W axis and read the gauge data.

5. The maximum difference between the gauge readings is the measured value

#### 10. Installation, testing, training and inspection

- Installation and commissioning: After the machine tool reaches the customer factory, our service
  engineer will go to the customer factory in time and conduct installation, debugging and on-site
  training.
- 2. Customers can choose to send operators to the company to be responsible for the early training for about a week, and the company will provide working meals, transportation expenses and accommodation at their own expense. Then the company in the customer installation and debugging field training.
- 3. Acceptance: precision acceptance, according to the supplier to provide the factory accuracy inspection table, in the customer conditional inspection, inspection, to do not have the inspection conditions of inspection items, such as positioning accuracy, spindle cone hole accuracy inspection rod test, not in the buyer, or negotiate by the buyer to the supplier factory for testing acceptance.

#### 10.After-sales service concept

- Pre-sale service: Yangsen's sales team will provide users with the best processing solutions, including
  machine tool selection, option configuration, tool and fixture selection, lubricating oil, cutting fluid
  management and other series of services. And can provide turnkey works.
- 2. Repair reaction time: Our company has a service team of up to 100 people, and equipped with a complete service vehicle, after receiving the user notice, the response within 2 hours.
- Parts inventory: Yangsen has a special production workshop and parts inventory in Xiamen, strong strength, complete inventory, commonly used parts inventory in each office, to provide users with the fastest maintenance parts.

- 4. Machine maintenance: All the machine tools within the warranty period enjoy free maintenance service, and the machine tools outside the warranty period can be purchased at an economical and reasonable price. And according to customer needs, planning equipment management, maintenance process.
- 5. Charge for maintenance after the warranty period: The charge standard is clear, only the cost, to open, fair, fair concept service users.
- 6. Special old user service department: Closely track the use of machine tools and handle maintenance complaints in time.
- 7. Maintenance supervision: The general manager is also the director of the after-sales service department to supervise the maintenance service quality in real time and protect the rights of customers.

#### 11. Working conditions of machine tools

- 1. Three-phase AC power supply:  $380V \pm 10\%$ , -15%;  $50Hz \pm 1Hz$
- 2. Ambient temperature: 8~40C
- 3. Relative humidity: 80%
- 4. Pressure of air source:  $0.6 \sim 0.8$  MPA

## Xiamen Yangsen NC Equipment Co., Ltd.

The company's products are constantly developed and improved, and the specifications may be changed without notice. Some pictures in this material may include a selection item.
